

How to make a

HOME TRAP

for mosquitoes

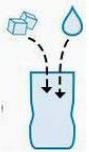

1

Cut a 2 liter plastic bottle in half

2

Mix sugar and water. Pour it into the bottle

3

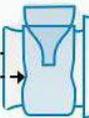

Add fresh yeast

4

Insert the top part

5

Wrap it in a dark cloth

Mosquitoes choose their victims because of the carbon dioxide they emit while breathing. The trap produces it and attracts them. **REMEMBER TO EMPTY THE WATER FROM THE TRAP ONCE A WEEK.**

!

REMEMBER!

TO FIGHT THE TIGER MOSQUITO KEEP THEM FROM BREEDING

TIGERS

DO YOU HAVE

AT HOME?

You might unknowingly be a **TIGER MOSQUITO BREEDER**

What is the TIGER MOSQUITO?

It is a mosquito, whose females feed on blood and **thas has come from Asia** to our Region and it has colonize here.

How to fight it?

They emerge from larvae that live in **small water clusters** that remain stagnant for at least a week. If we avoid these breeding sites, we will avoid the mosquitoes.

Why it is IMPORTANT to fight it?

Because apart from causing **annoying bites**, they can transmit illnesses like dengue or chikungunya.

DO YOU HAVE TIGERS AT HOME?

If a **tiger mosquito** bites you at home it is likely you have raised it yourself since they only fly a few dozen meters from the place where they are born.

Empty each week the containers that accumulate water: *pot plates, vases, flower vases, pet water dispensers.*

Cover hermetically the containers that you can't empty: *tanks, wells and drums. Cover the vents with adjusted mosquito nets.*

Turn upsidedown the containers that can accumulate rainwater: *buckets, wheelbarrows, ashtrays, kitchenware, watering cans.*

Get rid of garbage and debris that may accumulate rainwater: *soda cans, empty paint buckets, tins.*

Avoid water accumulations in sinks and gutters: *and use bleach to disinfect them every week.*

You can use fish in ornamental fountains and ponds as they devour larvae.

Keep pools and rafts clean and properly chlorinated.

They preferably bite **sunset and sunrise** and especially on the parts of the body close to the ground like **legs and feet**.

KEEP them from biting you

At that time, dress **light color clothes, long sleeves and trousers and socks.**

- Install **mosquito nets** in doors and windows.
- Use special **repellents** for the skin like such as those formulated with DEET, IR3535, icaridine or citrodiol, following the instructions for use and registered in the Spanish Agency for Medicine Health Products.

If you have been bitten already...

- Keep calm, the bites **do not usually cause major problems.**
- Wash the sting and apply a disinfectant for the skin.
- If the discomfort persists or you feel unwell, go to the doctor.
