TREATMENTS REPORT

Dear customers, we inform you that Control Natural de Plagas Mediterranean, S.L. going to carry out biocidal treatments in its facilities, which due to the nature of the products used can cause discomfort or adverse health effects. Please continue to pay attention to the recommendations and precautionary measures set out below to minimize such effects.

AREAS: comunal and green areas.

Date: **Start:** 00:30h **Conclusion:** 06:00h

PURPOSE OF THE TREATMENT: Disinsection treatment for adult mosquito control (Culex pipiens)

1. All the treatments carried out by Control Natural de Plagas Mediterranean, S.L., are carried out by qualified and authorized technicians in the application of biocides.
2. All the products used by Control Natural de Plagas Mediterranean, S.L., are authorized for the use or treatment we carry out, having a registration number in force for biocides in the Ministry of Health, Social Policy and Equality or registration number in force for pesticides in the Ministry of the Environment, Rural and Marine Environment.
3. We remind you that before carrying out the treatments, Control Natural de Plagas Mediterranean, S.L. performs an assessment of the pest to be treated and proposes treatments, always prioritizing the least aggressive methods for people and the environment (physical or biological methods), always limiting the use of chemical products to those cases in which other methods are insufficient to get the proper control.
4. In the choice of the product to be used, both hygiene and safety aspects are taken into account. (lower toxicity for humans and non-target species) and environmental (selectivity for the target species, less persistence in the environment), such as the time and place of treatment (moment of greatest vulnerability of the pest, product safety terms), in order to minimize the possible risks derived from treatments in both indoor and outdoor environments.
5. We attach to this communication the safety data sheets of the products employees, as well as a sheet of recommendations to follow, both prior to treatments, as well as during and after them, recommendations that should be transmitted to all residents who may be affected in the field of treatment.

RECOMENDACIONES / RECOMMENDATIONS

Antes del Tratamiento	Durante el tratamiento	Después del tratamiento
